Samsung Sakhalin
LLC/Samsung Heavy
Industries

Operator:

Sakhalin Energy
Investment
Company Ltd.

Services:

Hook-up,
pre-commissioning
and commissioning
assistance

Location:

Sakhalin, Russia

Project site:

Sea of Okhotsk,
approximately
16km off the
north-eastern coast
of Sakhalin Island

AG&P was contracted to undertake hook-up, pre-commissioning and commissioning assistance for Sakhalin II Offshore Gas Project in Sakhalin, Russia. Sakhalin II was the first offshore gas project in Russia and is now one of the largest integrated oil and gas projects in the world.

AG&P deployed 100 workers including supervisors, foremen, fitters [structural, mechanical, pipe and instrument], technicians, painters, testers, safety, clerical and other support staff to take responsibility for functions at the project site. The English-speaking team arrived onsite fully trained and ready to work from day one.

AG&P successfully completed its project scope in November 2009, achieving 1,296,000 man-hours without Lost-Time Incident (LTI). AG&P continues to hold the world's best construction safety record for safe man-hours, with only one minor LTI over the last decade.

AG&P is licensed by the Philippine government to recruit, process and deploy locally based workers to overseas jobs. We are a consistent recipient of awards and recognition by the government and clients for excellence in overseas manpower deployment.
