

AG&P

Infrastructure Reimagined and Delivered

Scalable LNG Delivery Platform

Features:

Platform 1:
4,000 to 8,000m³
capacity for shallow
water delivery

Platform 2:
6,000 to 16,500m³
for open water
delivery

Utilizes identical
hull design and
equipment from
6,000, 7,500,
12,000 up to
16,500m³

Yard:

Batangas Heavy
Fabrication, Yard 1
San Roque, Bauan,
Batangas 4201

AG&P is a 118-year-old industrial infrastructure company with world-leading credentials across our three lines of business: Gas Logistics (LNG supply chain design, development and marketing), Modular Construction and FieldCOM (manpower services and site works). We have a long, established heritage of successfully serving blue-chip clients on some of the world's most demanding projects in the mining, utilities and oil and gas sectors.

AG&P has developed a highly flexible and efficient small-scale vessel for efficiently transferring LNG to power plants, bunker fuel operations, transportation fleets and other industrial users.

AG&P's unique solution combines a shallow draft barge design with a conventional vessel hull over a scalable range from 4,000 to 8,000m³ capacity for shallow water delivery and 6,000 to 16,500m³ for open water delivery. This approach focuses on optimizing the storage and marine designs to drive cost efficiencies and adoption.

Each barge utilizes existing GTT membrane hull designs specifically configured to optimize tank configuration. The geometrical membrane tanks are standardized, reducing the cost of customized engineering.

All kits, including accommodation fitments and bridge equipment, are standardized packages, further reducing cost and speeding delivery time. Standardized, add-on equipment and components such as regasification tanks, cryogenic hoses and other technologies can be integrated into the design to create flexible and adaptable storage and transfer solutions to meet customer needs and project specifications.

These standardized solutions not only drive down costs, but also ensure higher quality and safety due to repeatability and experienced installation by AG&P's skilled construction and field teams.
